

Memorandum

Date March 25, 2010

From *Leah Graziano*
Sr. Regional Representative

Subject **Letter Health Consultation for the Former Jewett White Lead Property and Adjacent Residential Neighborhood (Residential Property 2009 Sampling Results), Staten Island, Richmond County, NY**

To

Kimberly Staiger
EPA/OSC/Edison

Attached is a copy of the **February 24, 2010**, Letter Health Consultation (LHC) for the above site. This document was prepared by the New York State Department of Health (NYSDOH) under a cooperative agreement with the Agency for Toxic Substances and Disease Registry (ATSDR).

This LHC is in response to a January 2009 letter to the USEPA, the NYSDOH determined that additional soil sampling was needed to better characterize the on-site and off-site soil conditions. This document summarizes NYSDOH's public health evaluation of potential exposures to lead in residential soils in the neighborhood south of the site and provides an update on actions taken on-site.

This site is a New York State lead site, and the LHC is available to you for your information and records. Additionally, this consultation is considered **Final** and will not be reissued unless new substantial information becomes available that would warrant re-evaluation. Copies or CD's of this document is available at your request; and should you have any questions or concerns, please feel free to notify my office at (212) 637-4306 or 637-4305.
